Introduction

Thank you for purchasing the MFJ-993RC IntelliTuner™ Remote Control. The Remote Control is used remotely to operate the MFJ-991, MFJ-993 or MFJ-994 IntelliTuner™ Automatic Antenna Tuner. Use a regular 9-pin-to-9-pin computer serial cable to connect the MFJ-993RC to the tuner's Remote port.

The buttons on the Remote Control work exactly like the ones on the automatic tuner; refer to the tuner's instruction manual for more details. Notice only the MFJ-993 has the [ANT] button. The red TUNING LED lights to indicate tuning is in progress. The green SWR LED lights when a match with an SWR less than or equal to the target SWR is found.

***Note:** To use the Remote Control, both the [ANT] and [AUTO] buttons on the automatic tuner must be pressed in; otherwise, Antenna 1 and Automatic mode are selected*

Technical Assistance

If you have any problem with this unit first check the appropriate section of this manual. If the manual does not reference your problem or your problem is not solved by reading the manual, you may call *MFJ Technical Service* at 662-323-0549 or the *MFJ Factory* at 662-323-5869. You will be best helped if you have your unit, manual and all information on your station handy so you can answer any questions the technicians may ask.

You can also send questions by mail to MFJ Enterprises, Inc., 300 Industrial Park Road, Starkville, MS 39759; by facsimile (FAX) to 662-323-6551; or by email to techinfo@mfjenterprises.com. Send a complete description of your problem, an explanation of exactly how you are using your unit, and a complete description of your station.
